

e-micro-bike 16" eego NOAHK I

SIZE – WEIGHT

driving mode: 1280 x 520 x 1000 mm
folded: mode 760 x 130 x 580 mm
9 kg incl. battery

DRIVETRAIN – TECHNOLOGY

eegoThinCake – the innovative, compact, maintenance-free and brushless 120W DC electromotor for optimum performance.

eegoDirectTech – the newly developed propulsion technology directly on the front wheel with automatic starting from 2 km/h onwards.

FRAME – FOLDING SYSTEM

eegoLiteSuspension folding frame made of magnesium with integrated carrier - serves as kickstand - extremely light, suspended, foldable and multifunctional.

eegoSmartFold Technology – nobody is folding easier, faster and smaller – without complicated closing mechanism, levers and screws, folded/unfolded in less than 5 seconds.

eegoLock – the fast and simple locking with U-bolt on the handle unit, T-style alloy, 560 mm.

eegoLink – the innovative connection to the folding frame with elastomer suspension and 40 mm damper.

BATTERY – OUTPUT

eegoIntegral LiION battery, 15V/12Ah, directly integrated in the frame, weight 1.300 g, 1.000 charging cycles, speed 20 km/h, mileage up to 50 km pedal assisted and up to 20 pure electric.

eegoCharge battery charger 110 – 240VAC 1.5A 50 – 60Hz, charging time up to 50% within 1 hour, full charge within 3-5 hours.

BRAKE SYSTEM – SAFETY

eegoBeltBrake – the newly designed band brake in the front, light and efficient.

eegoTektroVBrake - the high-class and famous brake system rear, for optimum safety.

The world's lightest E-bike !

9 kg inkl. Akku

ISPO BRANDNEW

Winner 2012

Let's (**ee**)go – experience and drive the new interpretation of lifestyle, urban mobility, love of life and comfort - we call it **Light-Pedelec**, the name is our game.

eegoNOAHK unifies all positive features of a convenient urban bike and a multifunctional, ultra light folding bike with the useful trend of electric pedal assisted bicycles.

Visual appealing in combination with multiple patented technology, highest functionality and modern design – the newly **eegoNOAHK e-micro-bike** excels due to the accomplished balance of power, size, energy and weight.

eegoNOAHK – no one is folding easier, faster and smaller, in less than 5 seconds. The **e-micro-bike eegoNOAHK** is the intelligent e-mobility solution for commuters, public transport and our generation of the 21st century, for which a sustainable, healthy style of life in combination with sanity, economy, comfort and independence become quite natural.

e-micro-bike 16" eego NOAHK I

IF product design award

The eego NOAHK I has received that international and sought-after award. It's one of the world's most important design awards. „Innovative design, thought-out functionality and unique aesthetics.“ – that's the judgment of the iFDESIGN jury.

LIGHTING – DESIGN

eegoSelfPower head light with 4 LED's and twilight sensor integrated within the frame. It's powered by the battery. If the battery is weak, power generation will be supplied by the electro motor.
LED back light

PEDAL SYSTEM

eegoClipIn pedal system, the practical pedal handling with bayonett-locks for fast pedal mounting.

DESIGN AND INNOVATION

eegoMicroBell - Design meets innovation. The new bell that's integrated within the break lever system is compact, handy and very fast to use. Thus it's providing more security.

COMFORT AND CONTROL

eegoDuoSoft – the comfortable handle with LED control for more comfort and ideal control.
eegoVeloAir – the ergonomic and convenient saddle.

EPAC-BICYCLE

European Pedelec norm EN 15194

COLORS

metallic-white/matte-black

In Germany and Switzerland a driving license is required to use the TwinDrive model!

Technical changes and misprints reserved!

Specified mileage per battery charge is dependent on diverse parameters: Ambient temperature, wind speed and direction, tire pressure, speed, weight of the driver, other vehicle payload, road condition, topography.
